

# HEAVY DUTY CHAINS

Designed for use on work and recreational vehicles: 4WD's, SUV's and large UTE's.  
Recommended on highway and all terrain tyres for off-road adventures or alpine winter travel.

## ICECAT

Ladder pattern design • Aggressive v-bar chain • Superior grip on icy surfaces

Supplied as a pair of chains.  
Comes with rubber bungy tensioners.

## ICECAT FEATURES

### Intended for these conditions:

- Off road and mountainous areas
- Snow types: heavy snow and thick ice
- Heavy terrain and hard packed surfaces
- Clay tracks and slippery wet paddocks

### Suitable for use on:

- 4WD's, SUV's and UTE's
- Highway, all terrain and radial tyres
- Vehicles for work, recreation or light commercial use
- Front or rear tyres depending on clearance
- Remote access sites eg: film crews and line services
- Service vehicles, rural operations, resort transport

### Performance:

- Excellent grip on slippery off-road surfaces
- V-bar chain breaks through ice to get traction
- Low profile design for better wheel clearance
- V-bar chain minimizes impact on farmland or parks
- Fit Icecat chains to the rear tyres to improve propulsion
- Hardened v-bar chain improves durability and strength
- Rubber tensioners work as shock absorbers

### Specifications:

- 5.5mm case hardened v-bar chain
- Full chain construction for extra strength
- Rubber tensioners with hooks (one pair)
