

COMMERCIAL

Designed for use on large trucks and buses. These chains have been developed for use on large radial truck tyres. Heavy-duty construction suitable for light to heavy commercial vehicles operating in challenging conditions.

LADDERCAT COMMERCIAL

Commercial vehicles • Suitable for duellers • Heavy-duty ladder construction

Supplied as a pair of chains.
Comes with rubber bungy tensioners.

LADDERCAT FEATURES

Intended for these conditions:

- Snow types: compact, deep or slushy
- Heavy terrain: off-road, gravel and dirt tracks
- Road types: sealed, unsealed, resort roads and mountain passes

Suitable for use on:

- Snowy roads for transportation
- Radial truck tyres and dueller wheels
- Large trucks and buses; heavy commercial vehicles
- Service vehicles, rural operators, resort transportation
- Scenic tourist buses and heavy transportation services

Performance:

- Ladder pattern provides good grip
- Quick and easy to fit on dueller wheels
- Twisted link chain provides a smoother ride
- Low profile design performs well on duellers
- 9.5mm twisted link chain has better wheel clearance
- Keep speed consistent when driving with ladder chains
- Ideal for trucks or buses used for transportation

Specifications:

- 9.5mm case hardened twisted link chain
- Full chain construction for extra strength and durability
- Rubber tensioners with hooks (one pair)
