

# COMMERCIAL

Designed for use on large trucks and buses. These chains have been developed for use on large radial truck tyres. Heavy-duty construction suitable for light to heavy commercial vehicles operating in challenging conditions.

## MUDCAT COMMERCIAL

Designed for trucks and buses • Heavy-duty diamond construction • Extreme conditions

Supplied as a pair of chains.  
Comes with rubber bungy tensioners.

### MUDCAT FEATURES

#### Intended for these conditions:

- Snow types: compact, deep or slushy
- Heavy terrain: off-road, gravel and dirt tracks
- Road types: unsealed, resort roads and mountain passes

#### Suitable for use on:

- Radial truck tyres and dueller wheels
- Off-road and mountainous areas
- Large trucks and buses, heavy commercial vehicles
- Service vehicles, rural operators, resort transportation
- Scenic tourist buses and heavy transportation services

#### Performance:

- Awesome traction on or off-road
- Excellent grip on slippery off-road surfaces
- Bigger chain provides better grip and durability
- Diamond pattern provides better chain coverage
- Better traction and control than ladder patterns
- Tough construction suitable for commercial use
- Recommended for large vehicles operating in alpine areas

#### Specifications:

- 7mm case hardened D-link chain
- Full chain construction for extra strength and durability
- Rubber tensioners with hooks (one pair)
