

HEAVY DUTY CHAINS

Designed for use on work and recreational vehicles: 4WD's, SUV's and large UTE's.
Recommended on highway and all terrain tyres for off-road adventures or alpine winter travel.

POWDERCAT

Diamond pattern chains • Recreational use • Designed for modern trucks

Supplied as a pair of chains.
Comes with rubber bungy tensioners.

POWDERCAT FEATURES

Intended for these conditions:

- Snow types: compact, deep or slushy
- Heavy terrain: off-road, gravel and dirt tracks
- Road types: sealed or unsealed plus ski resort roads

Suitable for use on:

- 4WD's, SUV's and UTE's
- Highway, all terrain and radial tyres
- Vehicles for work, recreation or light commercial use
- Steep and slippery club field roads

Performance:

- Excellent grip on slippery road surfaces
- Bigger chain provides better grip and durability
- Low profile design for better wheel clearance
- Diamond pattern provides better chain coverage
- Better traction and control than ladder patterns
- Rubber tensioners work as shock absorbers

Specifications:

- 5.5mm case hardened D-link chain
- Full chain construction for extra strength
- Rubber tensioners with hooks (one pair)
